## **PERSONAL STATEMENT:**

Hi I'm Ismail Yusuf, I'm 22 and I am an aspiring Data analyst. I recently finished the tech talent accelerator course with Generation UK which is a 6 week long intensive coding boot camp.

I am someone who learns very quickly and can adapt in many different circumstances. I have worked a variety of different jobs which has helped me to build many versatile skills in different fields. I think this is a key strength to have as a data analytics apprentice as during the job there will be many different challenges I will be faced with like preparing/presenting reports and inspecting/modelling data so being able to adapt and learn quickly is vital.

## **EDUCATION**

<b>2009-2014</b>	<b>GCSE</b>	<b>Enfield Grammar School</b>
